

DIRECTORATE OF INDUSTRIAL LIAISON

NED University of Engineering & Technology
University Road, Karachi-75270 Pakistan

Tel: (+92-21) 99261261-8, Ext: 2274, 2218, Email: dil@neduet.edu.pk

Dated: 20th March, 2025

Are you building a tech-based* startup or have a prototype that could create real social impact? Do you want access to funding, mentorship, and global recognition?

**MIT Solve defines technology broadly as the application of science and evidence-based knowledge to practical challenges in human life. Eligible solutions may utilize apps, SMS technology, software, AI, robotics, drones, blockchain, and virtual reality, as well as traditional, ancestral, and natural technologies and knowledge systems to drive impact.*

MIT Solve is an elite platform supporting **high-potential innovations** in areas like:

Health & Well-being

How can we use technology to make good health and quality care more accessible for all?

Sustainability & Climate Action

How can communities create a zero-carbon world and adapt to a warming climate?

Education & Learning

How can we make quality learning opportunities more accessible, while improving outcomes for all learners?

Financial & Economic Inclusion

How can communities use technology to build and sustain financial and economic opportunities and resilience for all?

This year, GSM is looking to elevate youth-led innovation, creating opportunities for young changemakers to scale their ideas. We are selectively partnering with a **limited number of student-led startups** to co-apply and strengthen their chances of success.

We are particularly interested in solutions that cater to the needs of women and the youth—whether in healthcare, education, financial inclusion, or any other sector. However, we welcome all innovative ideas that align with MIT Solve's themes and our organization's commitment to social impact.

By applying with us, you will receive:
